About Us

Water Repellent is the construction chemical arm of Trinity Rubber which is a six decade old industrial rubber manufacturing company.

Under the venture of WR Water Repellent, this valor institution provides water repellent and stain-repellent chemicals for construction industries. Considering the current climatic conditions, we provide ergonomic and long-lasting products that can resist the ingress of water and also keep the structural integrity intact.

Each of our offerings is tested by our quality control department so you can be sure of the reliability of the products. In fact, we only provide those products that are able to match the standard transmission rate.

Experience-driven innovation.
Quality you can trust.
Protection that lasts.

Product **Innovation Centre**

Our in-house R&D and testing laboratories specialize in nano-technology, material science, and surface chemistry to develop high-performance surface protection systems.

We design tailor-made formulations based on specific surface types, environmental conditions, and performance requirements.

All products are developed and validated through rigorous laboratory testing for water and oil repellency, durability, UV resistance, and environmental stability. With a strong focus on low-VOC and eco-responsible technologies, our solutions deliver reliable, application-specific protection across stone, concrete, masonry, textiles, and more.

Why Use?

Natural stones/bricks/concrete have three main enemies, regardless of whether they are used indoors or outdoors.

01 HUMIDITY/ MOISTURE (WATER PENETRATION)

Kandla Grey

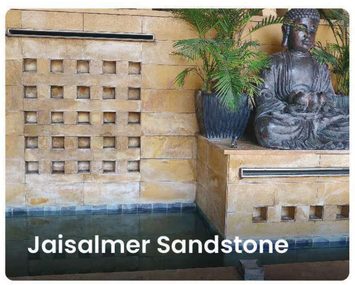

Sadarali Granite

Bijolia Sandstone

02 CLIMATE (UV RADIATION, EFFLORESCENCE AND ALGAE)

Sandstone

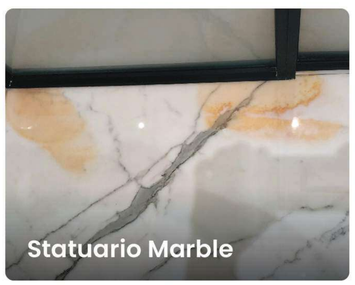

Bricks

Jaisalmer Sandstone

03 STAINING SUBSTANCES (OIL, FOOD, OR GROUT)

Kandla Grey

Imported Marble

Statuario Marble

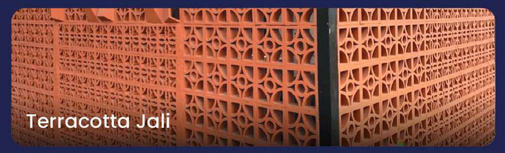

Where To Use

Interior, Exterior, Flooring & Cladding

Clay

Also can be used on :
Mud Bricks, Burnt Bricks And Roof Tile

Stone

Also can be used on :
Granite, Lime Stone, Basalt, Laterite Stone, Stone Veneers, Travertine, Quartzite, Onyx, Indian & Imported Marbles

Concrete

Also can be used on : **Concrete Panels, Mosaic, Micro Concrete, Cement Sheets, Stamped Concrete, Gypsum Sheets, Engineered Stones & Ceramic Tiles.**

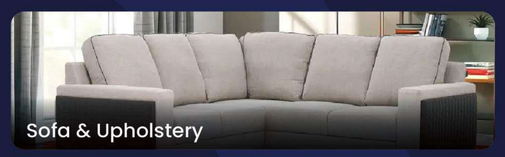

Glass

Also can be used on :
Shower Enclosures, Architectural Façade Glass

Fabric

Also can be used on :
Cotton, Wool, Jute

Choose Us For

PROVIDING SERVICE

Service is a key element in our business strategy. By providing value to customers through service, achieve sustainable growth.

PRODUCT SUGGESTIONS

Delivering the appropriate product in surface was a critical factor for this segment

OUR EXPERIENCE

We have a wealth of experience in this field, and we deliver more effective guidance than our competitors.

RANGE OF PRODUCTS

A wide variety of products that differ in their chemical characteristics and pricing options.

ONE FOCUS

Our primary focus from past few years was sealers (surface caring chemicals), to improve life of different surfaces

Water Repellent

Surfaces don’t deserve damage -
Shield them before water leaves a mark.

Advanced Nano Protection for Stone, Concrete & Clay

Our advanced Water Repellent Solutions are designed to shield stone, clay, and concrete by drastically reducing water absorption. The result? Surfaces stay dry and strong while retaining their natural beauty and breathability.

TR-89

- **Water-based, ready-to-use** repellent
- **Preserves natural look** and breathability
- Suitable for porous stone, burnt brick, and concrete

TR-813

- **Water-based** water repellent for porous surfaces
- **Mix with water in 1:7 to 1:9 ratio**
- **Maintains natural look** and breathability
- Ideal for porous stone, brick, and concrete

TR-S-500

- **Water-based** water repellent for porous surfaces
- **Mix with water in 1:7 to 1:9 ratio**
- **Keeps natural look** and breathability intact
- Best for sandstone wall (laterite stone), burnt bricks and concrete

SSB-19

- **Solvent-based, ready-to-use** Repellent
- **Keeps surfaces natural** and breathable
- Ideal for concrete wall panels, natural stone walls & burnt bricks

Back Coat S

- **Solvent-based** & Ready to use water repellent sealer.
- Prevents backside efflorescence, moisture stains & salt formation.
- **Preserves natural appearance** while allowing breathability.
- Suitable for back side of marbles , imported marbles & other stones.

TR-S59

- **Water-based, ready-to-use** with milky color
- **Keeps natural look** and breathability intact
- Best for sandstone, laterite stone and concrete

Concshield

- **Solvent-based, ready-to-use** Repellent
- **Keeps surfaces natural** and breathable
- Ideal for concrete wall panels & other concrete items

Benefits

Trusted and certified
Proven performance with tested formulations for lasting surface care.

Powerful Shield
Reduces weathering and efflorescence.

Breathable Protection
Allows moisture vapor to escape, preventing trapped dampness.

Eco-Friendly
Available in low-VOC, water-based formulations.

DIY Friendly
Easy to apply - no professional tools or skills required.

UV stable
Ideal for both interior and exterior use.

Stone — Granite, Slate, Sandstone Laterite Or Any Rough Stone Or Back Side Of Stone

Concrete — Mosaic, Gypsum Boards, Concrete Panels, Cement Sheet & AAC Block

Clay — Bricks, Terracotta Roof Tiles, Rammed Earth, Expose Brick, & Clay Bricks

Our products can be used on (Interior, Exterior & Cladding only)

Stone Sealer

Advance your stone protection
With nano sealer technology.

Stone surfaces are an investment-and they deserve care.

Stone sealing creates a protective shield that keeps your natural stone safe from stains, moisture, and surface damage. It makes surface both water and oil-repellent, helping it stay beautiful and strong.

Stone Sealer LIT

- **Solvent-based & Ready to use** water & mild oil repellent sealer.
- **Preserves natural beauty** and allows breathability.
- Easy to use for interior/exterior stones, stone veneers & Exposed concrete.

Stone Sealer 19

- **Solvent-based & Ready to use** oil & water repellent sealer.
- **Nano sealer** with deep penetration for strong stain protection.
- **Maintains stone's original look** & Breathability.
- Ideal for any stone (marble, granite, sandstone etc.) & concrete.

Stone Sealer 15-W

- **Water-based & Ready to use** water & oil repellent sealer.
- **Offers no colour change to mild wet look** with eco-friendly protection.
- Suitable for polished and unpolished stones & stone veneer, including countertops.

Stone Sealer 15

- **Solvent-based & Ready to use** water & oil repellent sealer.
- **Preserves natural beauty** and allows breathability.
- UV-resistant, low VOC, & easy to apply.
- Suitable for marble, granite etc. & concrete.

Rock Seal

- **Solvent-based & Ready to use** water & oil repellent sealer.
- **Fluorine-free**, breathable, eco-friendly.
- **Preserves natural beauty** Ideal for **any stone** (marble, granite, sandstone etc.) & concrete.

Benefits

Trusted and certified
Proven performance with tested formulations for lasting surface care.

Deep Impregnation
Invisible protection that penetrates deep and defends against UV damage.

Oil & Water Repellent
Protects against oil, grease, and moisture while maintaining the stone's natural look.

Breathable Protection
Lets the surface breathe, preventing white marks and damage from trapped moisture.

Preserves Natural Beauty
Keeps the original color and texture without adding gloss or film.

Long-Lasting Shield
Advanced nano-technology provides deep, durable protection for years.

Packaging Available in containers

1 L, 5 L, 20 L, 30 L

Stone Indian & imported marbles, (sand , lime, granite, slate stones), stone veneers, quartz

Concrete Terrazzo, mosaic, wall panels, GRC, exposed wall, micro concrete, cement sheets, artificial stones.

Clay Bricks, mud bricks, terracotta jali & roof tile, rammed earth.

Our products can be used on (Interior, Exterior, Flooring & Cladding)

Enhancer

Bring out the stone's true beauty - naturally enhanced.

A color enhancer enriches and deepens the natural shades of stone, bringing out textures, patterns, and character that often remain hidden. It also adds protection against water and stains while maintaining breathability, non-glossy or glossy finish.

Color Enhancer

- **Solvent-based & Ready to use** water & oil repellent sealer.
- Provides **rich dark** finish and allows to breathe.
- Ideal for any porous granite, sandstone, and concrete.

Floor Ptect 15

- **Solvent-free nano system** providing deep **dark wet look.**
- **Highly water & oil resistant.**
- UV-resistant and **VOC-free.**
- Suitable for marble, granite, sandstone, and concrete.

MatWet

- **Water-based medium wet look sealer.**
- Protects against water-based stains with maintain breathability.
- Can be used **diluted (1:1 to 1:3) or directly** on surface.
- VOC-free, UV-resistant, and suitable for porous stone, concrete & brick **(cladding only)**

Stone Sealer CEM

- **Solvent-based & Ready to use** water & oil repellent sealer.
- Provides **rich dark** look with maintain breathability.
- Ideal for any porous Slate, stone veneer and other stones.

Matt 200

- **Water-based mild wet look sealer** designed for unpolished surfaces.
- **Breathable, UV-resistant, and VOC-free**, suitable for indoor and outdoor application.
- Easy to apply using brush, roller, cloth, or spray.

Floor Ptect

- **Solvent-free sealer** designed for rough stone and concrete.
- Provides **rich dark** finish and strong **stain protection.**
- UV-resistant, solvent-free, and easy to apply.

Matt 100

- **Water-based semi wet look sealer** for unpolished and porous stone surfaces.
- **Breathable, UV-resistant, VOC-free, and non-hazardous,** ideal for both interior and exterior use. (cladding only)
- Easy to apply using brush, roller, cloth, or spray.

Benefits

Trusted and certified
Proven performance with tested formulations for lasting beauty and protection.

Color Enrichment
Deepens and enhances natural stone tones for a rich, elegant appearance.

Water & Oil Repellent
Guards against spills, stains, and moisture while keeping the surface clean.

UV & Weather Resistant
Prevents fading and discoloration, ideal for both interior and exterior use.

Preserves Surface Texture
Enhances color without forming any surface film or altering texture.

Durable & Long-Lasting
Advanced nano-based formula ensures enduring protection and vibrant finish.

Stone Any finished Sand, lime, Basalt, granite, slate stones, Brazilian granite, stone veneers, quartz

Concrete Terrazzo, mosaic, wall panels, exposed wall, micro concrete, artificial stones.

Clay Bricks, mud bricks, terracotta jali & roof tile, rammed earth.

Our products can be used on (Interior, Exterior, Flooring & Cladding)

Cleaners

Clean with confidence - safe, strong, and effective.

Our professional-grade cleaners are formulated

to remove dust, stains, grime, and daily buildup from stone and surface materials—without causing damage or dullness. They clean effectively while being gentle on the surface and safe for the applicator.

Klynn Cemnt

- Removes **cement residue, grout haze, and mortar stains** effectively.
- Fast-acting and suitable for post-construction cleaning.
- Works on **sandstone, granite, brick, vitrified and mosaic tiles (not for marble or limestone).**
- Easy to apply and provides high coverage & efficiency.

Universal Cleaner

- A cleaner formulated with specialty chemicals for effective removal of **rust stains, mineral deposits, and tough surface contaminants.**
- Designed to deliver **fast-acting, visible cleaning** results with **minimal effort.**
- Easy to apply and, a versatile solution for both **construction and maintenance applications.**
- Ideal for rough stone such as **any sand stone and granite and other surfaces.**

Klynn Lime

- Effectively removes **hard water stains and lime deposits.**
- Restores **shine and cleanliness** on stone, metal, and glass.
- Fast-action, **ready-to-use formula** with **multi-surface compatibility.**
- Safe for **granite, brick, tiles, sanitary ware, and shower glass.**

Klynn N Seal

- **Cleans and seal the surface in a single step.**
- Provides **water and oil repellency** to extend surface life.
- Safe for **natural stones, vitrified tiles, concrete, and terrazzo.**
- User-friendly, eco-friendly, VOC-free, and non-hazardous.

Klynn Surfa

- Removes **stains of coffee, tea, oil, turmeric, wine, and more.**
- **Acid-free, non-corrosive, and safe for daily cleaning.**
- Perfect for kitchen tops, dining tables, floors, and walls.
- Works on **natural and artificial stones, vitrified and mosaic tiles, glass surfaces (except limestone).**

Klynn Rust

- Formulated with specialty reactive chemicals for effective **removal of rust and iron-oxide stains.**
- **Fast-acting cleaning** mechanism delivers quick and **visible results** with controlled surface interaction.
- Suitable for application on **sandstone, granite, and other compatible natural stone** surfaces.

Benefits

Trusted and certified
Tested formulations that deliver reliable cleaning performance for professional and everyday use.

Powerful Cleaning Action
Effectively removes cement film, lime scale, dirt, and tough stains from various surfaces.

Surface-Safe Formulation
Designed to clean without damaging natural stones, concrete, tiles, or metal surfaces.

Fast & Effective
Works quickly to restore the original appearance of surfaces with minimal effort.

Eco-Friendly Formula
User-safe and eco-conscious — causes no irritation or harm during application.

Easy to Use
No special equipment or expertise required.

Stone — Indian and imported marble, sandstone, Granite, travertine, slate, and quartz.

Concrete — Polished concrete, terrazzo, micro concrete, pavers.etc.

Clay & Tiles — Bricks, terracotta, ceramic, and vitrified tiles.

Metal & Glass — Suitable for faucets, shower areas, and architectural glass (product-specific).

Densifier

Invisible hardening for marble & concrete

Our densifier is an advanced formulation

that is available in both water and solvent-based variants. It reacts within the surface to enhance hardness, durability, and long-term performance.

Stone Densifier Low Grit

- **Nano lithium & potassium silicate**-based densifier designed for **early-stage** surface strengthening.
- Creates a **crystalline silicate network,** enhancing the hardness and durability of stone and concrete.
- Recommended for use after **200 grit polishing stage** for optimal absorption.

Densifier

- **Water-based ready to use system** formulated to strengthen and restore weathered stones.
- Works by forming a **crystalline silicate network,** increasing surface hardness and durability.
- Ideal for **imported marble, Indian marble, granite & concrete terrazzo.**

Stone Densifier High Grit

- **Nano lithium silicate-based** densifier formulated to strengthen and restore weathered or porous stones.
- Creates a **silicate crystal network** that improves surface hardness and durability.
- **Ideal for use after 800 grit polishing** to enhance stone compaction and gloss retention.

Stone Consolidator

- **Solvent-based consolidator** formulated to penetrate deeply into porous stone and mineral substrates.
- Reacts within the substrate matrix to **strengthen, bind, and consolidate weak or friable surfaces.**
- Enhances **surface durability, abrasion resistance, and long-term structural stability.**
- Suitable for **natural stone, sandstone, limestone, concrete, and other mineral-based surfaces.**

Benefits

Trusted and certified
Proven and tested to strengthen and protect concrete and stone surfaces for years.

Surface Hardening
Increases surface density and abrasion resistance, minimizing wear and tear.

Deep Penetration
Low-grit formula penetrates deep for base densification, while high-grit enhances surface gloss and hardness.

No Color Change
Maintains the natural look and tone of the surface without darkening or altering

Eco-Friendly Formula
Water-based , ensures safe and sustainable use.

Long-Lasting Strength
Reacts chemically to form a dense, durable, and maintenance-free surface.

Stone Indian & imported marbles (specific white marbles) , Sandstone, limestone, and other porous natural stones requiring additional surface hardness.

Concrete Terrazzo, Polished concrete floors, industrial slabs, precast panels

Our products can be used on (Interior - Industrial, Commercial & Residential)
